

Künstler Information

The artist **Gü** lives and works in Vienna. Inspired by the four elements of hip hop culture, he created his first motifs in the form of graffiti and stencils.

His current mode of expression is drawing by hand and then editing designs in self-taught graphics programs. By processing conscious and subconscious impressions, his images are created on paper and on the monitor.

“In many moments in life I am reflecting on my perception of the world through graphic artwork”

In the **Schwarz auf Weiss** creative phase, most of the subjects were hand-drawn, digitized, edited in graphics programs and published as screen prints on ecologically produced tote bags. In subsequent exhibitions, the artwork was presented in A1 formats.
